Languages
English
Ukrainian
Polish

Profile

I have started learning programming some time ago. Currently I am working on Python, TypeScript, C# .NET Core and Angular 15. Still, I am open to other programming languages. I work on two projects, at the same time. The first project is the light and modern file manager using the Avalonia UI (WPF) cross-platform framework. The second one is the full stack application for generate/create CV, using Angular 15 for front-end, ASP.NET Core WEB API for back-end and using MongoDB like database.

Employment History

Intern junior Python/C# developer, Xopero One, Gorzów Wielkopolski

May 2023 - August 2023

- in the beginning of the internship I was doing and finished successfully tasks like Tic-Tac-Toe, BlackJack, phone book (PySimpleGUI)
- I was offered to study C# programming language
- my first task on C# was app (MVVM, WPF) for office recruiter: add, edit, delete, search employer (name, contract, salary...)
- I was working on existing project (Git Protect). Optimize data in LiteDB, and remake endpoint which starts back up. Moreover I was additionally working with GitHub Actions. For example, after every commit repository back up starts (execute endpoint)
